MB Consulting

Profile and Philosophy

MB Consulting is a comprehensive, integrated consultancy for architecture, interior design, project management and lean construction with its head office in Jaipur, Rajasthan. Led by Mr. Madhur Bumb, the firm is engaged in a diverse range of residential, commercial, retail, hospitality and leisure projects.

We at MB Consulting believe that architecture is a way of life and impacts every person of the society, whether the architect, the resident or even a passer-by.

‘It is art, an exact science and everything in between.’

Our design philosophy rests on the classical Virtuvian principles of architecture - *utilitas firmitas venustas* (function, quality and delight).

We take the responsibility of bringing an architectural structure into this world very seriously and aim at creating iconic and timeless spaces inspiring comfort, joy and motivation.

Sustainable and Enviro-Friendly Architecture

A long term strategy at MB Consulting is to create ecologically sensitive architecture utilising natural features in our design where possible. Such ideas involve exploiting natural ventilation, natural light, recycling and reuse of materials and creating green spaces. Environmentally mindful design is not seen as a separate facet of the process, it is incorporated from the initial stage of concept creation.

Effective Client Interaction

We understand that each project is unique in its character and requires special attention to detail. At MB Consulting, effective client interaction stands at the very core for achieving excellence in design. We appreciate and encourage design ideas and inputs from the client to ensure the space is reflective of the client's needs, style and personality.

State of the Art Digital Techniques and Capabilities

MB Consulting is a pioneering firm committed to and fully equipped with technical proficiency in an array of software for accurate and efficient design and planning. We provide 2D and 3D renders, models and walk-throughs to help the client visualise the buildings accommodating their style and requirements to complete satisfaction.

Maximising Value

We endeavour to minimise wastage, amplify efficiency and create value in our architecture to accommodate budgetary concerns without compromising on the aesthetics of the design. We aim at creating buildings that will stand the test of time in terms of durability and fashion.

Innovation in Design, Construction Technology and Financial Planning

The team at MB Consulting constantly strives towards innovation in every aspect of our work from designing, choice of material to well calculated methods of execution.

Amalgamating International Standards with Indian Needs

We specialise in architecture and construction of Vaastu compliant residential, commercial, retail, hospitality and leisure spaces abreast with International standards and design trends.

Team work

We pride ourselves on the capability and efficiency of our in-house team and associates, constantly striving to innovate and exceed expectation. We boast of a highly skilled crew of architects, structural engineers, draftsmen, legal counsel, site managers and services consultants ready to take on any challenge that we may face during a project.

Madhur Bumb

Proprietor and Principal Architect

(MSc. , B.Arch. , RIBA, RICS)

Madhur Bumb graduated from the University of Nottingham, United Kingdom with an Honours degree in Bachelor of Architecture following which he obtained an Honours degree in MSc. Construction Project Management from the prestigious University of Manchester, U.K.

He was awarded a Gold Medal for academic excellence by the University of Manchester. Further, his works on Lean Construction are published by the University of Manchester and are a widely recommended reading for students of Lean Construction and Construction Project Management.

Being a proponent of sustainable innovation in design and construction, Madhur has been involved in a wide spectrum of projects in India ranging from office buildings and exhibition centres to villas and townships.

Along with specialization in architecture and design, his expertise stretches to various arms of a multifaceted construction project including Strategic and Financial Planning of projects, Contract Management, Design Management and Value Management.

Madhur believes that we live our lives in and around buildings; the spaces we occupy define our thoughts and personalities. He has founded MB Consulting with the aim to change the cultural, social and economic landscape by transforming the perception of architecture and the built environment through his inspiring works.

Our Services

What we do!

At our firm, we offer a comprehensive range of construction & design services.

Architecture

We are committed to providing integrated architectural design services, from concept design to construction supervision for residential, commercial, retail, leisure and hospitality spaces.

Our designs are a product of a splendid fusion of aesthetics and functionality while always incorporating the client's requirements, budget, style and personality.

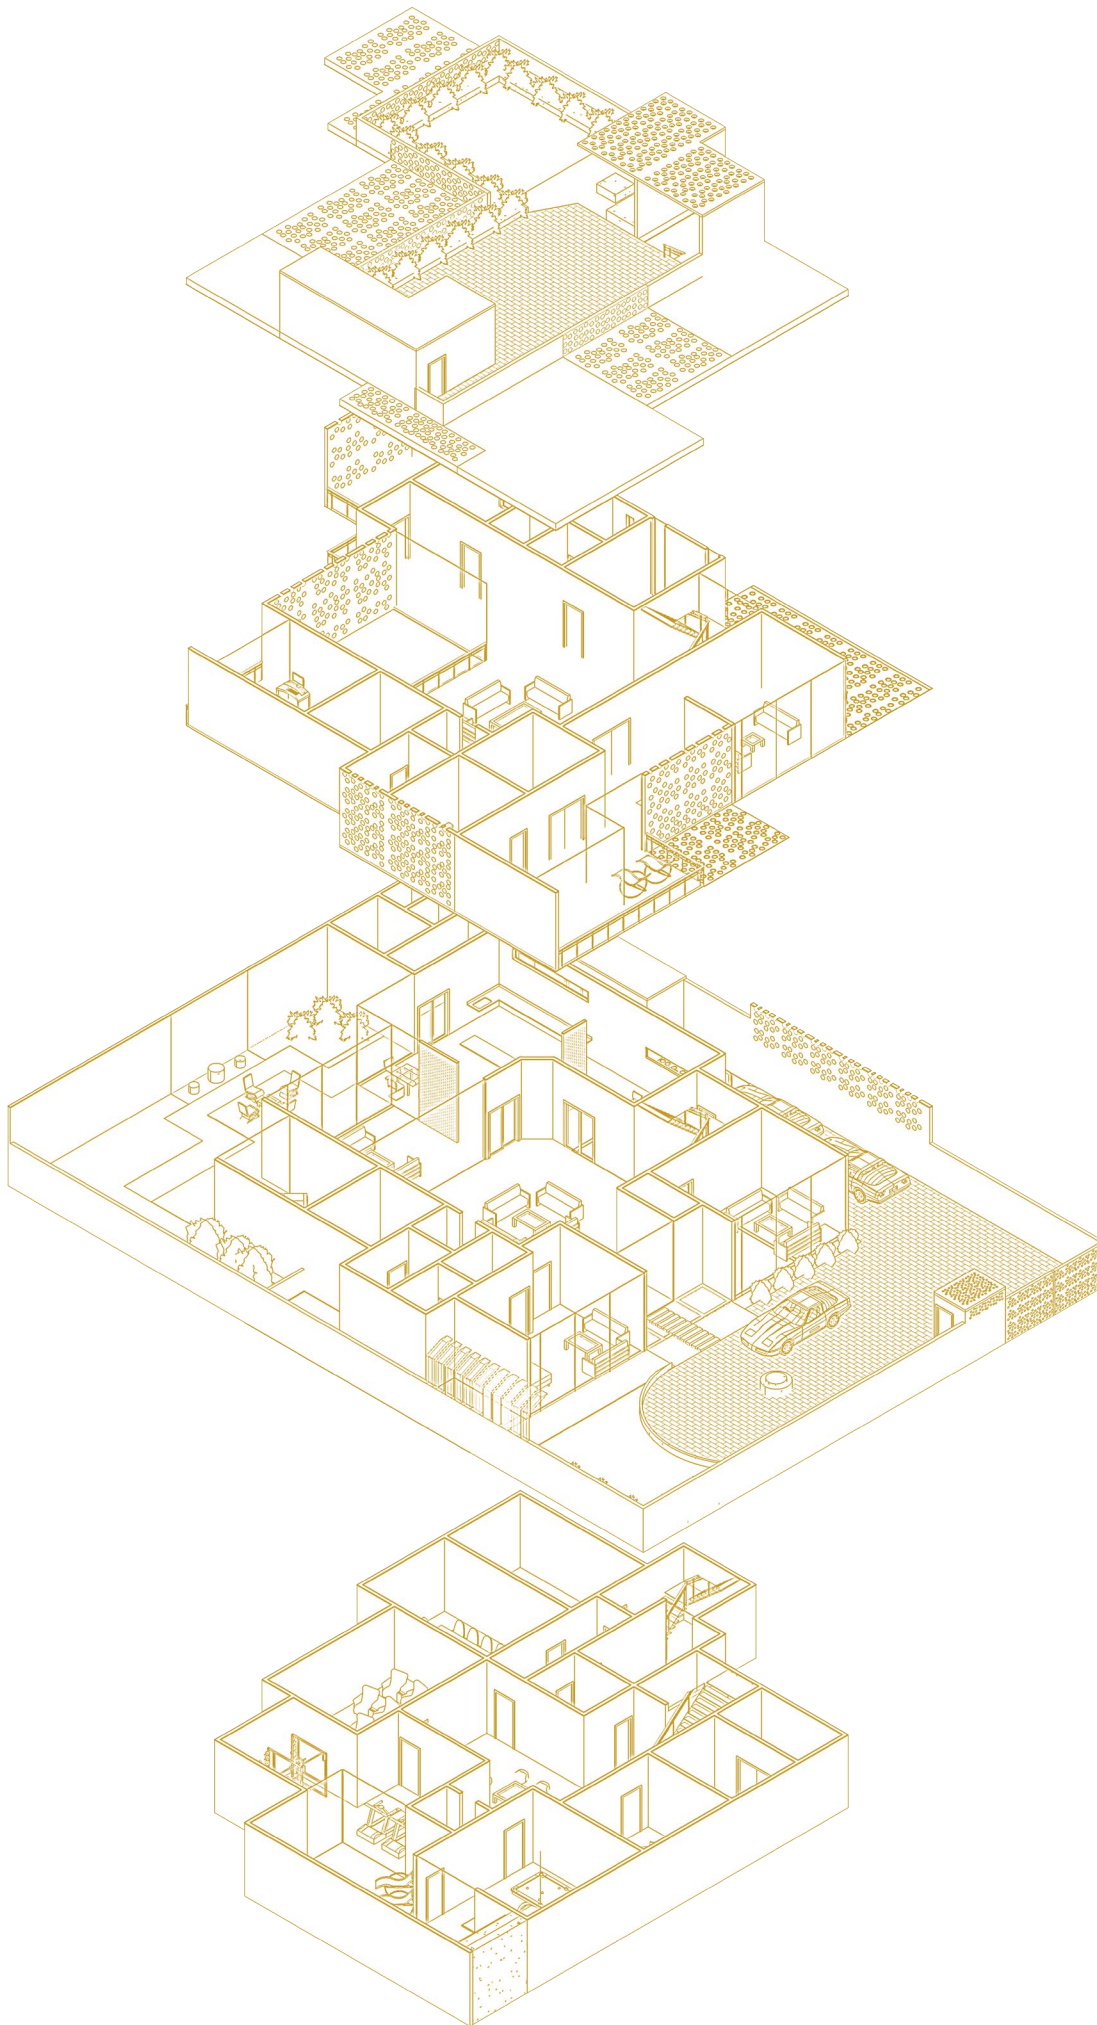

Interior Design

We specialize in creating integrated, sustainable and inspiring interior spaces. Our diverse works cater to both contemporary as well as traditional taste to fulfil all of the client's expectation and desired purpose from a space.

Design and Build

We undertake Design and Build projects for residential, retail, commercial, leisure and hospitality spaces. In our role as design and build consultants we carry out all works from preparation of concept design to project completion.

We also undertake responsibility of the structural drawings, MEP drawings, cost analysis, co-ordination with other consultants, budgeting and time scheduling for successful completion of the project.

Project Management

We provide expert project management services encompassing all stages of a project from pre-construction to project close-out. Our Project Management services inter-alia include

- Time scheduling
- Cost estimation and budget analysis
- Value Engineering
- Construction Management and Supervision
- Post Construction Management

Additionally, we provide an efficient Management Information System (MIS) for integration, analysis and dissemination of vital project data to enhance co-ordination and productivity.

The MIS supports the business processes, provides an operative roadmap of the project and Business Workflow Analysis.

Lean Construction

We are expert practitioners of Lean Construction techniques aiming at maximising value and minimising waste. We possess the know-how and ability to complete projects within record schedules with amplified quality.

Construction Financial Planning and Advisory

Owing to the crucial nature of financial factors in the success of a construction project, our all-rounded firm also specializes in Strategic Financial Planning, budgeting and financial management for our construction projects.

With detailed discussions and planning with the client, we provide effective financial advice through all stages of the project and ensure quality completion of the project within budgetary limits and timelines.

In a nutshell, when it comes to a building, there is nothing that we don't do!

A villa that feels like living in a piece of art. Its splendid structure houses all modern facilities catering to the desires and aspirations of all members of the client family. While being luxurious in every sense of the word, this contemporary home exemplifies sustainable innovation with expanse of green spaces and employment of state of the art renewable power. We consider it our architectural masterpiece.

This contemporary villa which is to be the new family home of the client is an oasis of tranquillity with ample green spaces and water bodies.

*Like all our villas,
the design and
architectural
aesthetic is a
product of efficient
daylighting studies,
built environment
analysis and
brainstorming;
utilising natural light
and
ventilation for an
enviro-friendly house
to provide comfort,
function, beauty,
luxury and serenity to
the residents.*

This green round-about driveway in this villa makes for a grand and refreshing entrance. It literally feels like 'coming home'.

This basement is created to serve as a family space with an indoor swimming pool adjacent to a home gym, home theatre, garden and lounge. We are driven by our constant passion for innovation in every space we create to achieve function and delight.

Commercial Retail Outlet

This structure reverberates with luxe and fashion both inside and out. The strategic design of the delicately cantilevered glass display windows is classic of our core philosophy of beauty with a purpose. If you see it, you can't resist but step in!

Commercial

Lumiere: The Luxury Retail

The architecture of Lumiere is motivated by the eternal hide and seek saga of light and shadow. Built in the commercial hub of the city, this minimalist design redefines commercial architecture and adds value to the luxury brands it houses.

Ethereal in its facade, Lumiere enhances the Jaipur skyline and provides serenity in its simplicity.

Commercial Offices & Mixed-Use Spaces

Our commercial complexes and office spaces are designed to provide maximum visibility and brand value to the clients. The architectural style is kept functional yet aesthetically appealing to provide a light and inspiring work environment. Ecological soundness of the designs is an inevitable characteristic.

Leisure & Hospitality Open Air Restaurant

ALFRESCO

The hunger for creating an exceptional dining space has inspired the design of Alfresco. The fine symphony of Japanese architectural philosophy in the exterior structure-simple, calm and refined and Italian interior aesthetics reflected in the warm azure and white upholstery, make this otherwise zen space vivacious and joy-inspiring.

SUBWAY

This contemporary restaurant design reflects the three pronged focus on environmental, social and economic growth required for a brand to succeed in the 21st century. The facade is inviting, unique and exemplifies sustainable architecture at its core.

This boutique hotel is designed to be a modern urban retreat. It is a hallmark of 'Green Luxury'. With the dual aim to provide maximum brand value to the client and creating environmentally sound buildings, A5's design is personal, authentic and creatively intriguing while its vertical green areas are a respite from the urban environment.

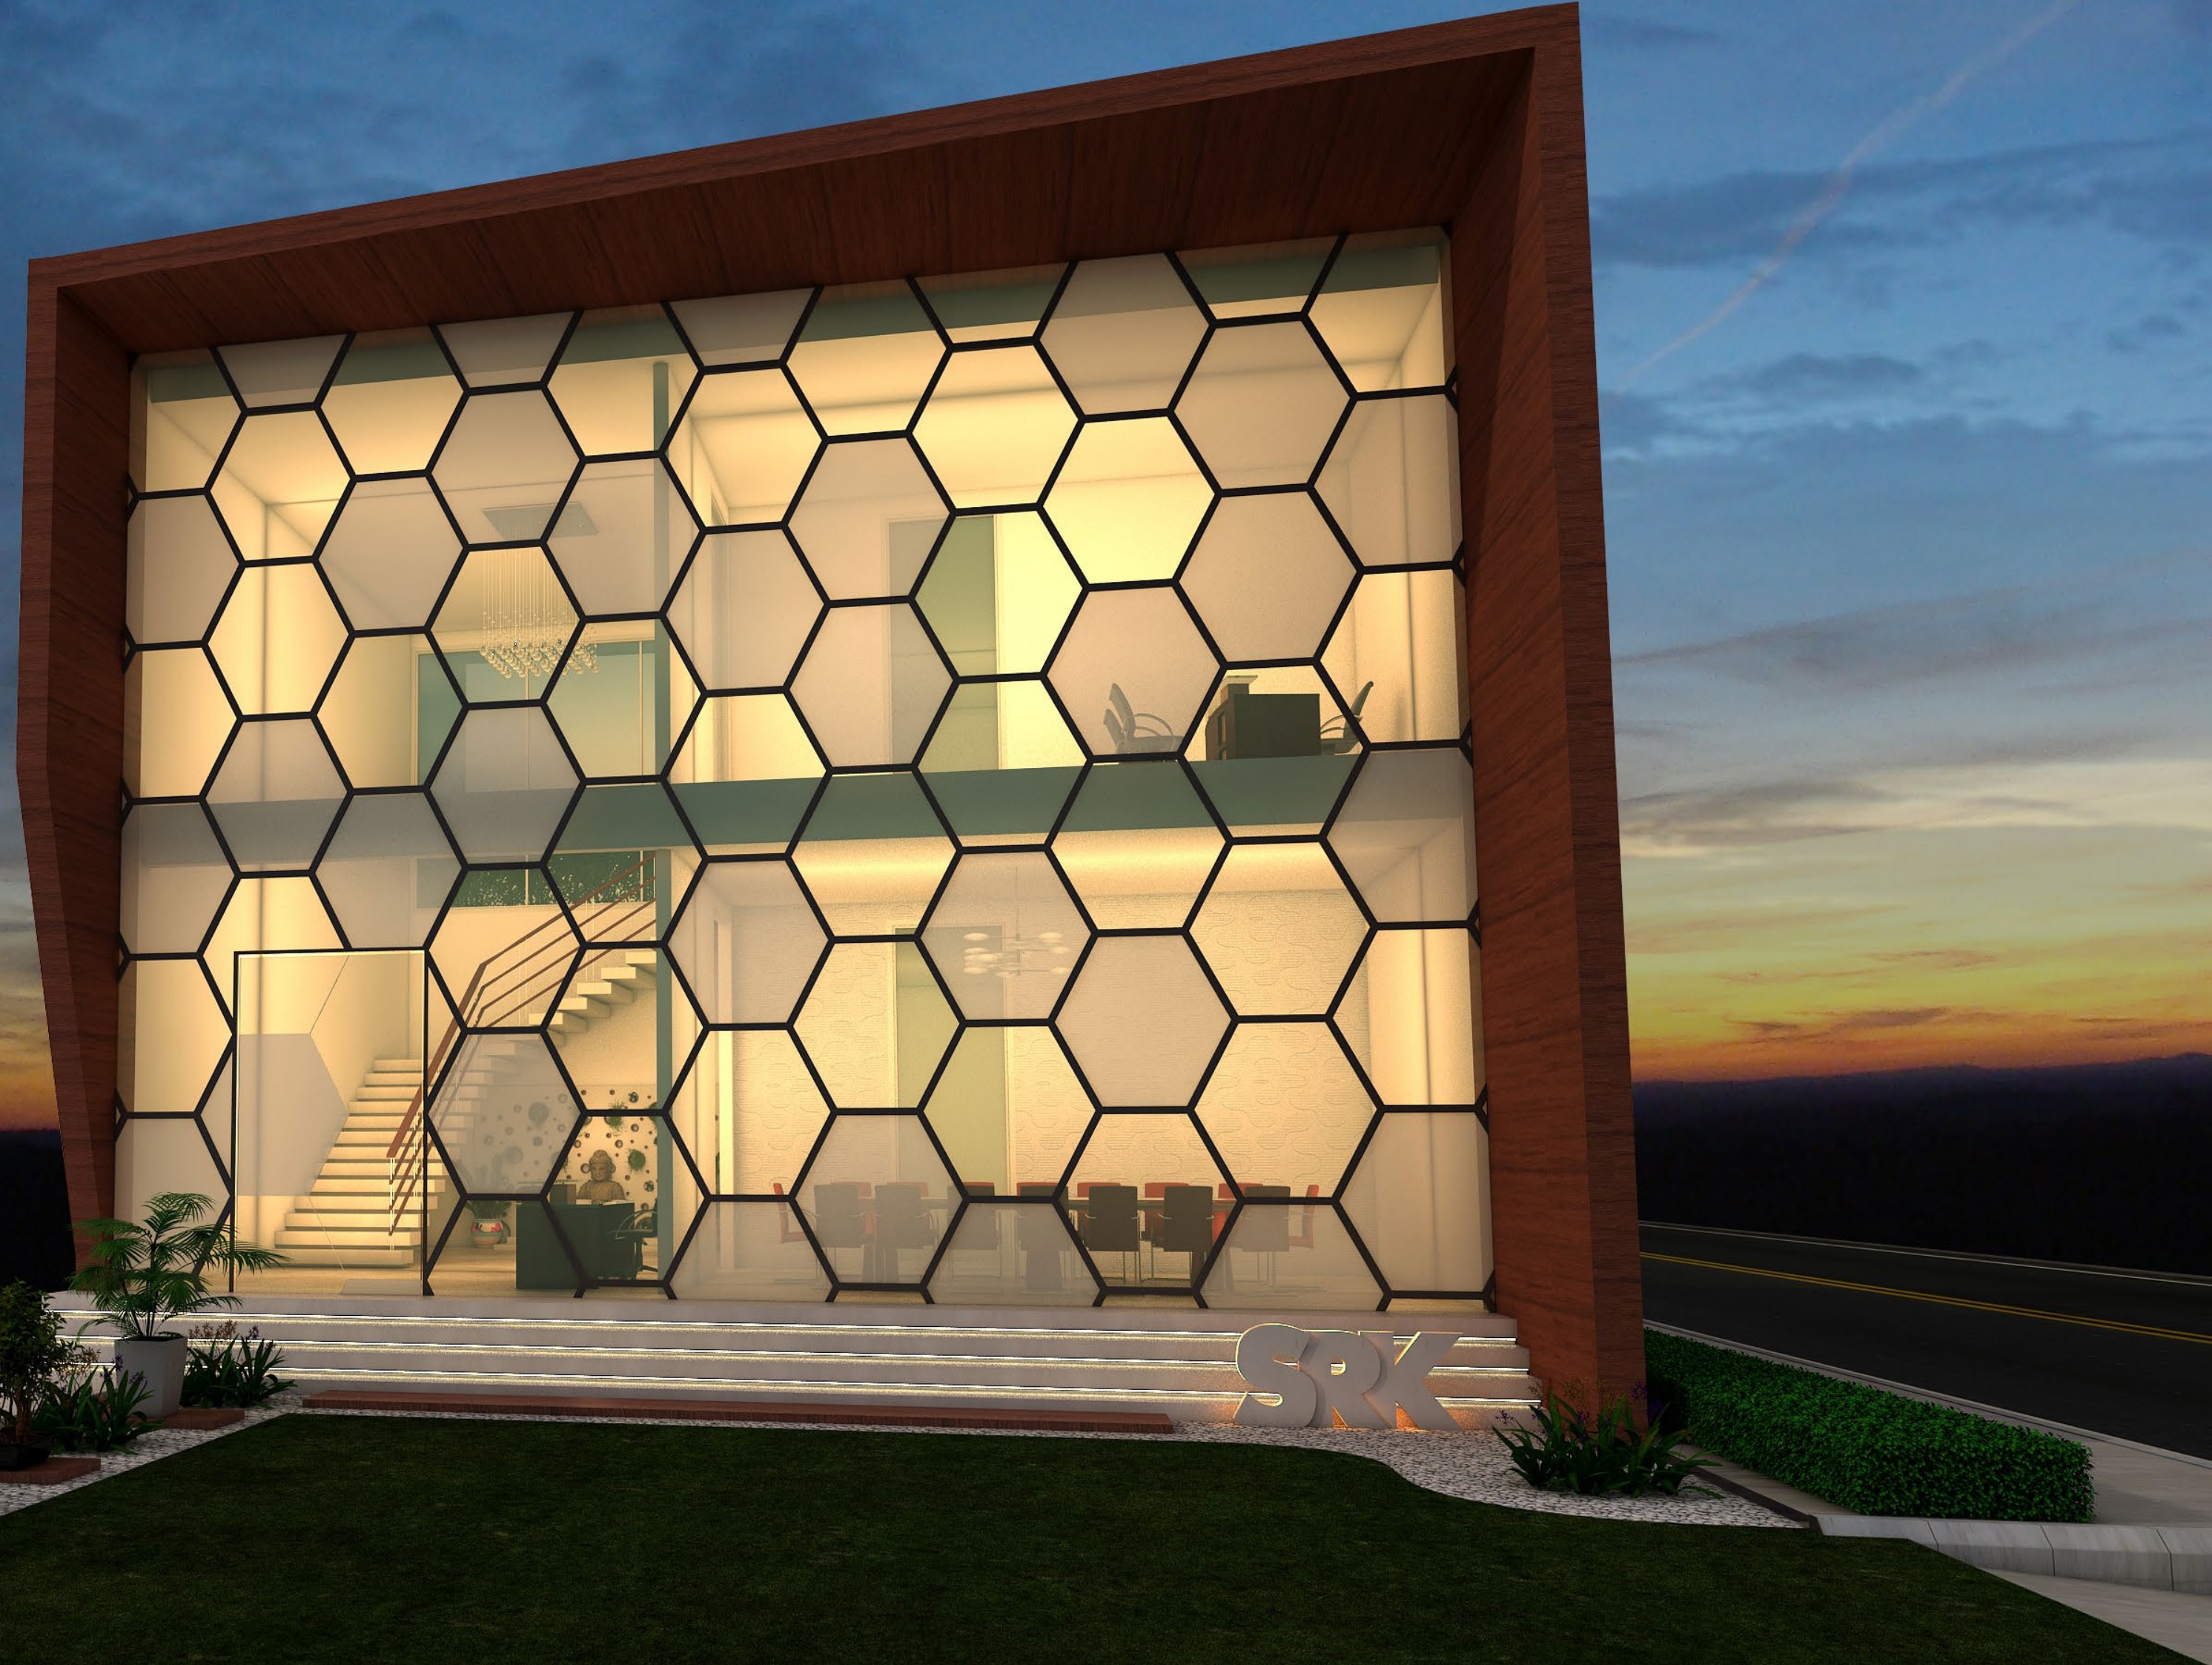

Hospitality

Banquet & Premium Rooms

This building with a banquet hall and premium guest rooms, reflects a splendid marriage of the Mughal and Rajputana styles radiating a sense of tradition, luxury and grandeur which is emblematic of Rajasthani Heritage. Our aim with traditional architectural style is to entice a feeling of time-travel to the ages of aristocracy with a twist of modern day facilities.

Industrial *Management Headquarters*

Created to serve as the Management Headquarters of a large furniture company, the asymmetrical facade is fashioned as a scaled up art in wood much like the furniture made by the client.

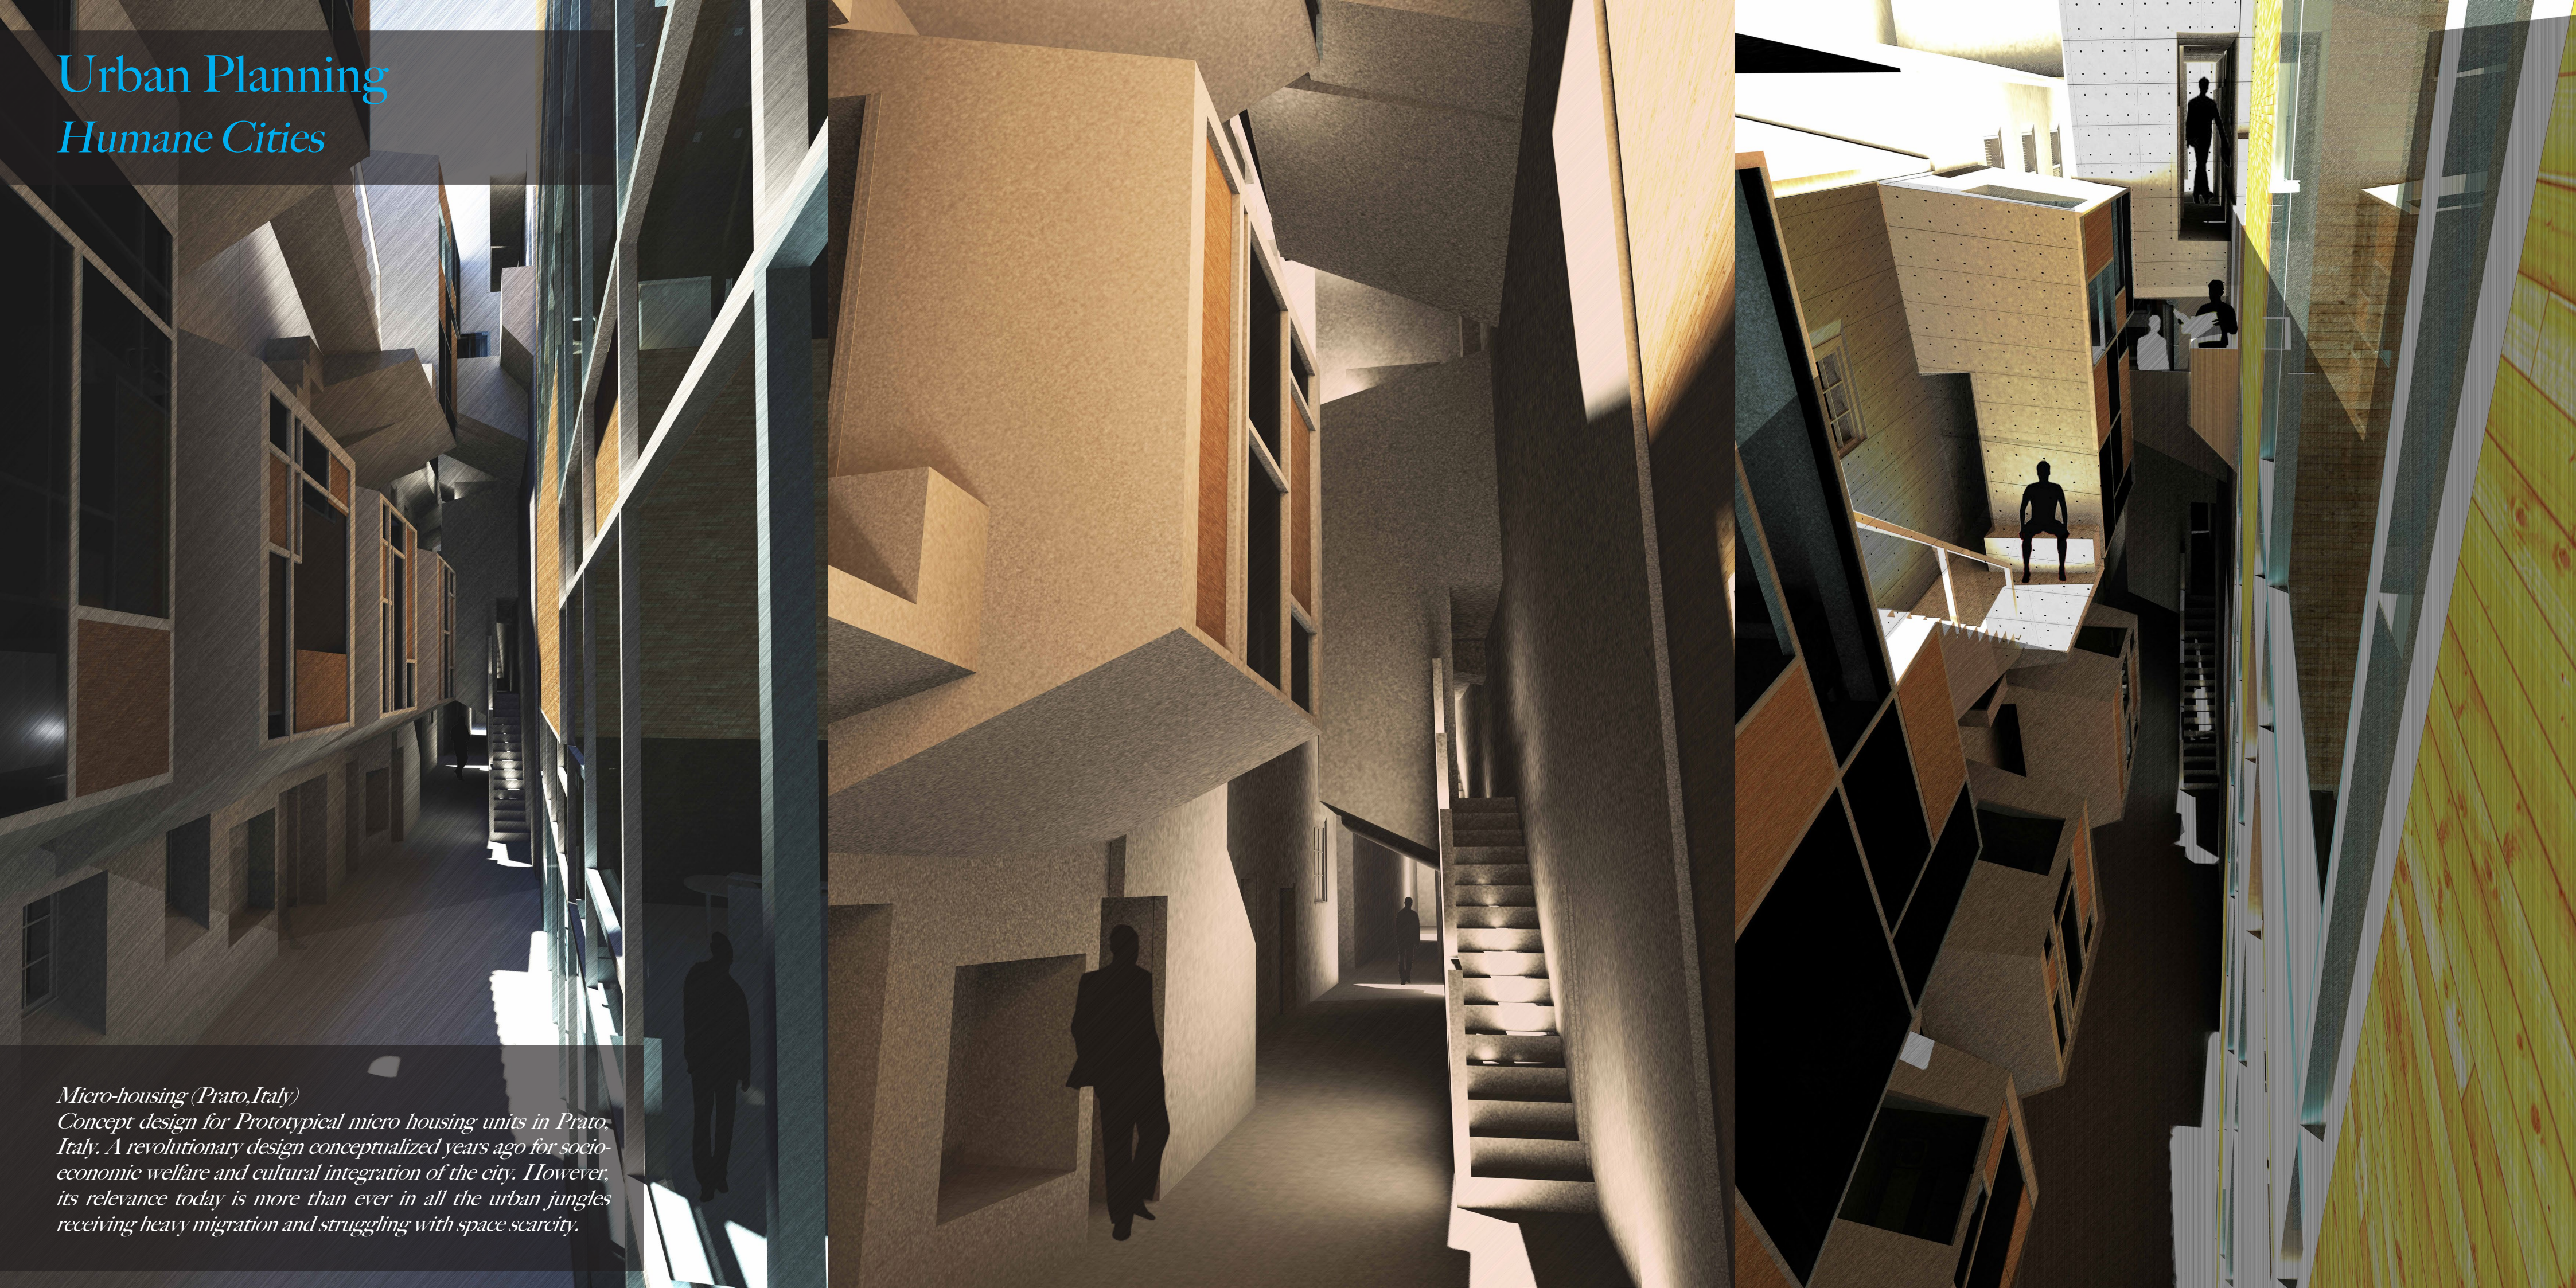

The hexagonal glass panels create motifs in the facade to add a visual character bringing about a magnificent interaction with natural light.

Urban Planning

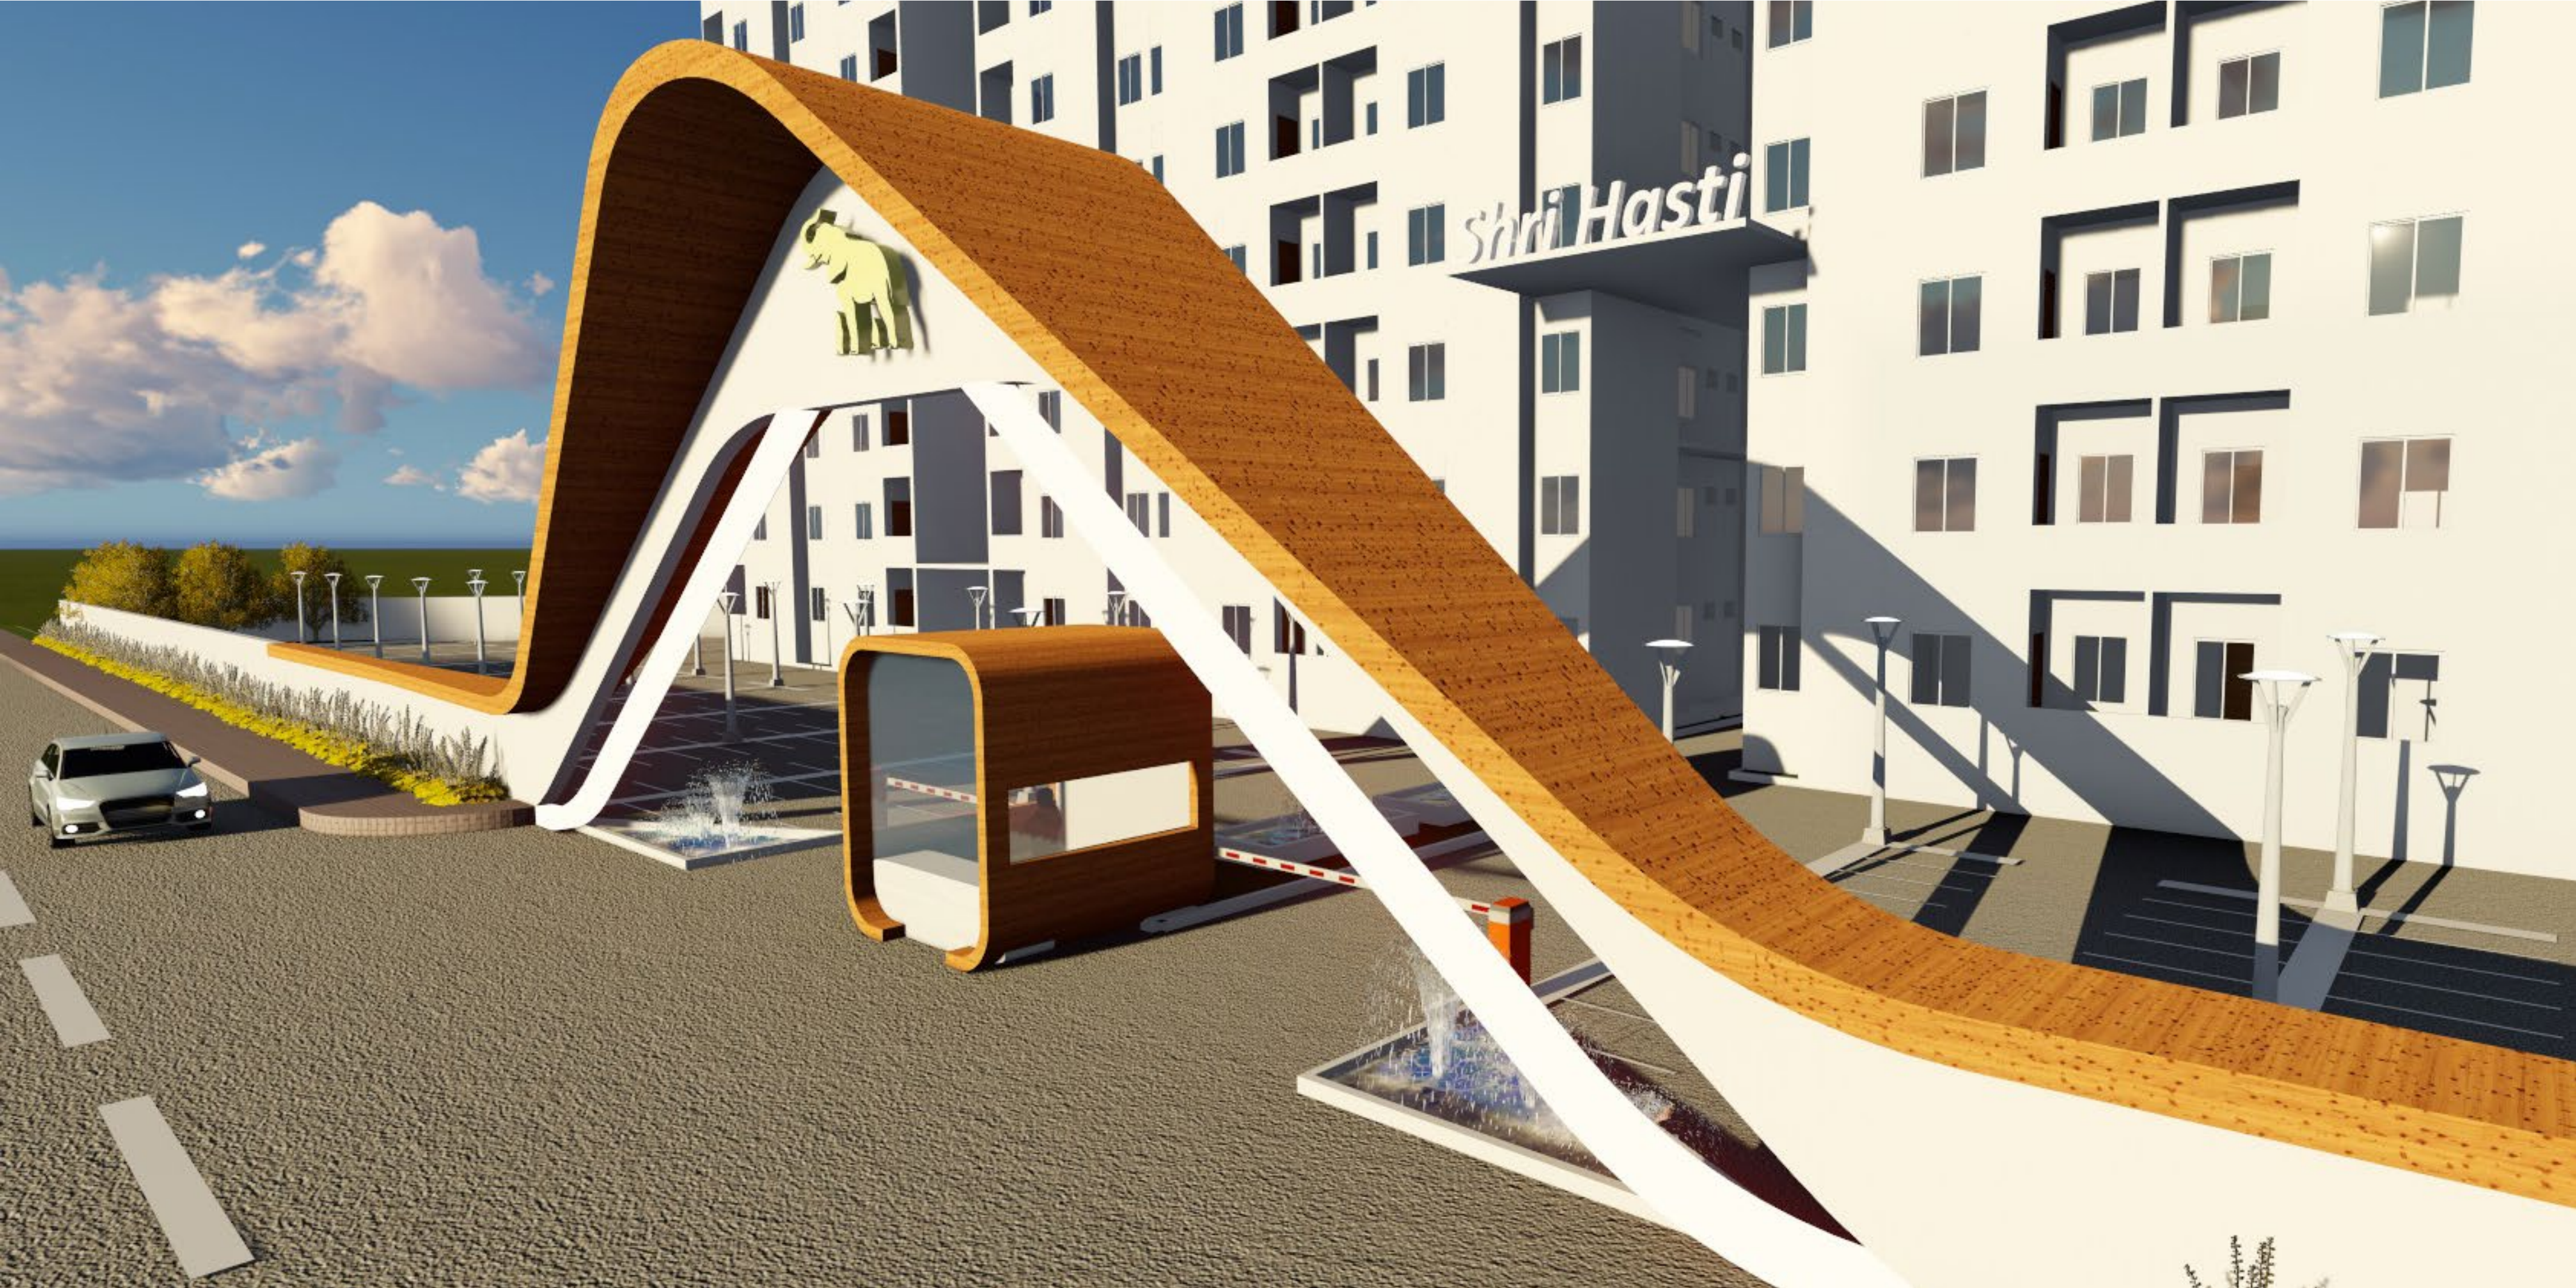

Humane Cities

Micro-housing (Prato, Italy)
Concept design for Prototypical micro housing units in Prato, Italy. A revolutionary design conceptualized years ago for socio-economic welfare and cultural integration of the city. However, its relevance today is more than ever in all the urban jungles receiving heavy migration and struggling with space scarcity.

In the spirit of our architecture, our urban designs are human-centered and environmentally sustainable. The aim is to build cities that are Smart and humane. Designed to be the home of 5,800 future residents, this township under the "Housing-For-All" scheme provides ample green spaces and activity centers to bring together people from diverse backgrounds to interact and thrive.

Interior Design
Luxury Villas

We aim to create awe inspiring first impressions. This entrance lobby for a luxury mansion radiates modern grandiosity in its exquisite detailing. It is not a passage, it is an experience.

The guest reception extends a warm welcome to guests and residents alike. Beaming with natural light, the space invites you with open arms.

This kitchen is designed to be the mecca of any culinary enthusiast. With a significantly large space it incorporates ample storage for kitchenware and items of all sorts. The cozy table facing a kitchen garden makes for a wonderful casual dining space for the family.

This formal dining room is created to be a feast for the eyes. Being a wonderful place to entertain friends and family, every meal here would feel like a celebration. The classic and simple interiors featuring accent wingback dining chairs with an Italian marble top dining table add infinite charm and our love for nature inspired us to create a subtle view to the outside garden while enjoying a meal.

Ultra modern home theatre design featuring state-of-the-art technology and absolute comfort. A haven for the ultimate entertainment experience in your home.

Our immaculate space planning helps us create the most beautiful of spaces in the least imagined areas. For instance, we are transforming the way you look at and use the basement in your house. This basement lounge is designed as an open plan entertainment zone blending with the outdoors for natural light, ventilation and grandeur. The interior designing is classy, contemporary and crisp, definitely aimed to be the new face of luxury.

The exclusivity and sophistication of this space creates the perfect meeting room for your important people. The flawless balance of ease and power exuded by this space makes it a must-have.

We understand the magnetic pull of the magnificent villas we create for our clients. A home office space is therefore essential. This grand home office and personal study is a gentleman's dream, providing a peaceful solitude to contemplate and be inspired. The furniture is kept elegant, contemporary and minimal. It also features a private garden to make the space eco-friendly and whole.

We treat powder rooms and bathrooms with the same attention as any other space in the house adorning it with art, accent tiles, greenery and statement lights.

This powder room holds immense oriental charm with the rich wood and white combination giving it a sense of calm and relaxation. Its luxury lies in its simple intricacy, classic of Asian design.

Lanscaping Outdoor Grandeur

This all weather terrace of a luxury bungalow is designed to evoke an emotional response which is part meditative and part dramatic. The pergola seating is strategically designed to provide comfort and tranquillity factoring in solar positions all year round. The central pyramid enhances the aesthetics while functioning as a statement skylight for the indoors.

This transitional space serves as a private patio accessible from the bedroom, embracing spacial integration of the outdoors with the indoors.

Apart from the environmental friendly character of the design, the aesthetic utilisation of the space speaks for itself.

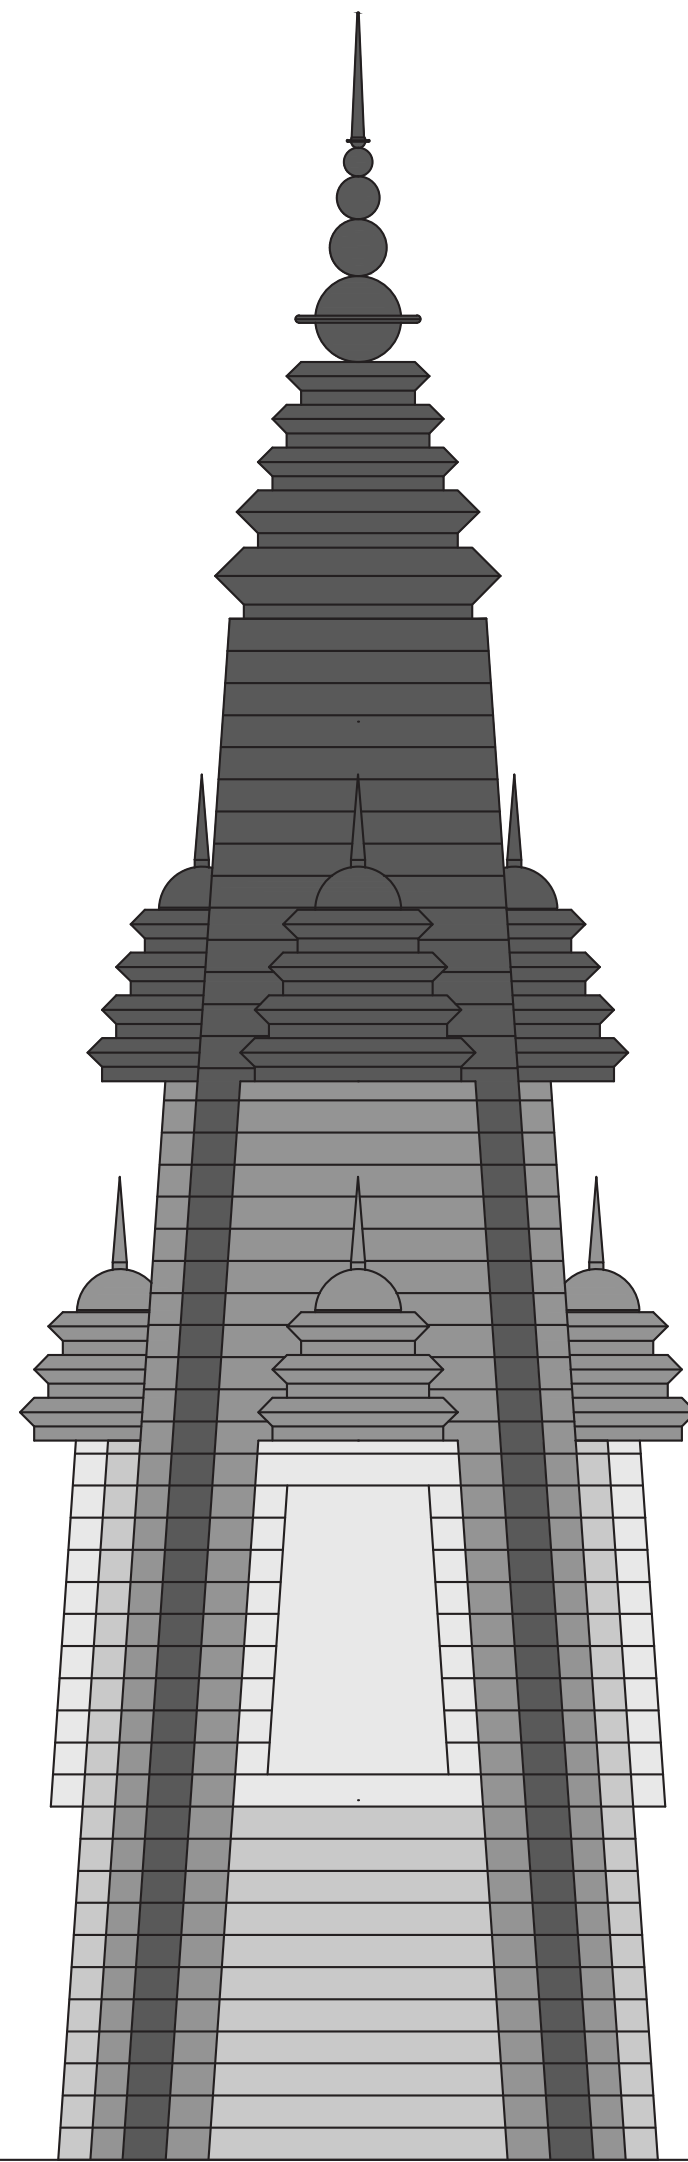

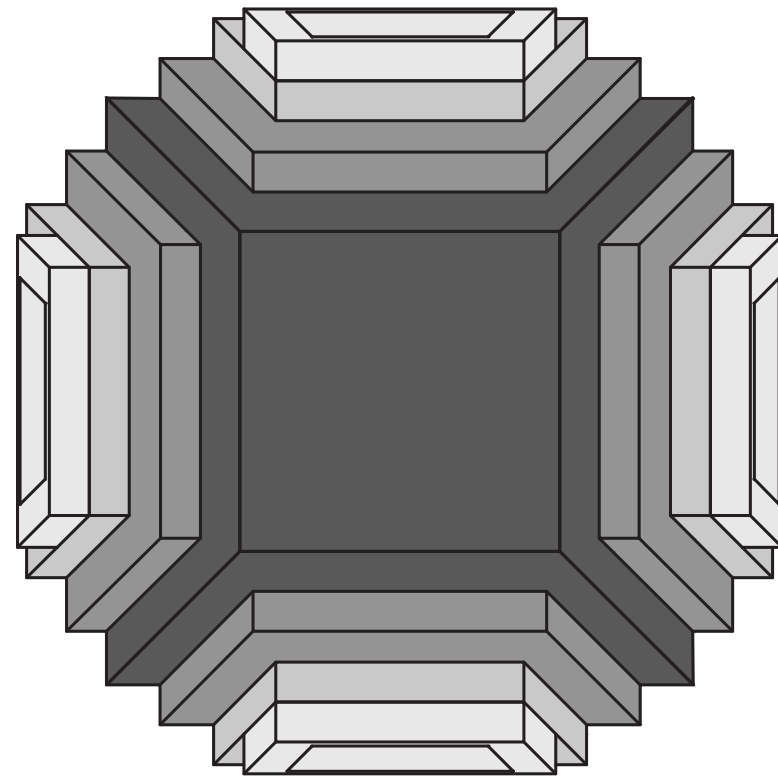

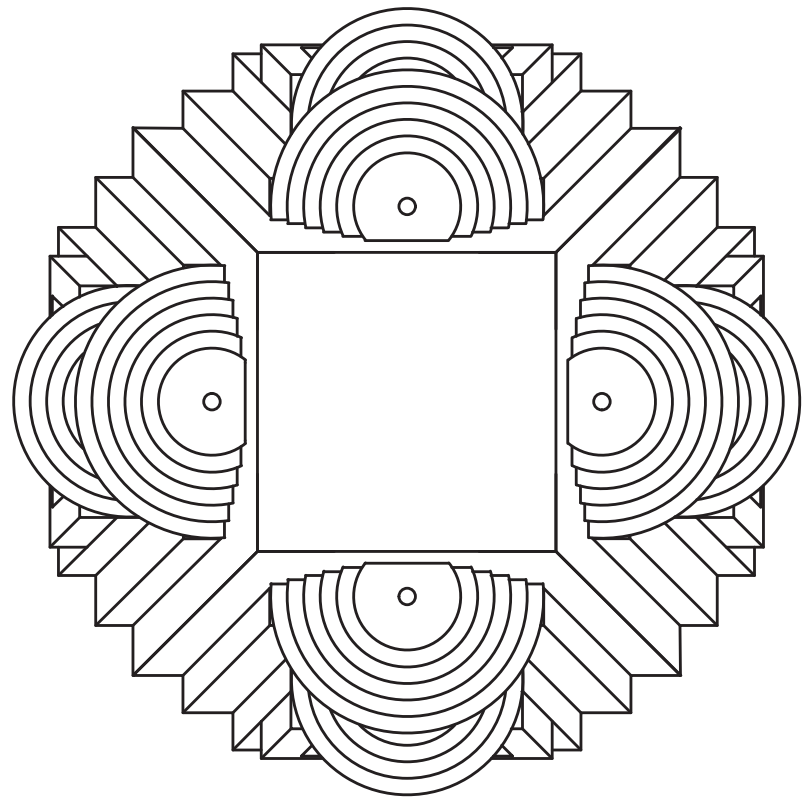

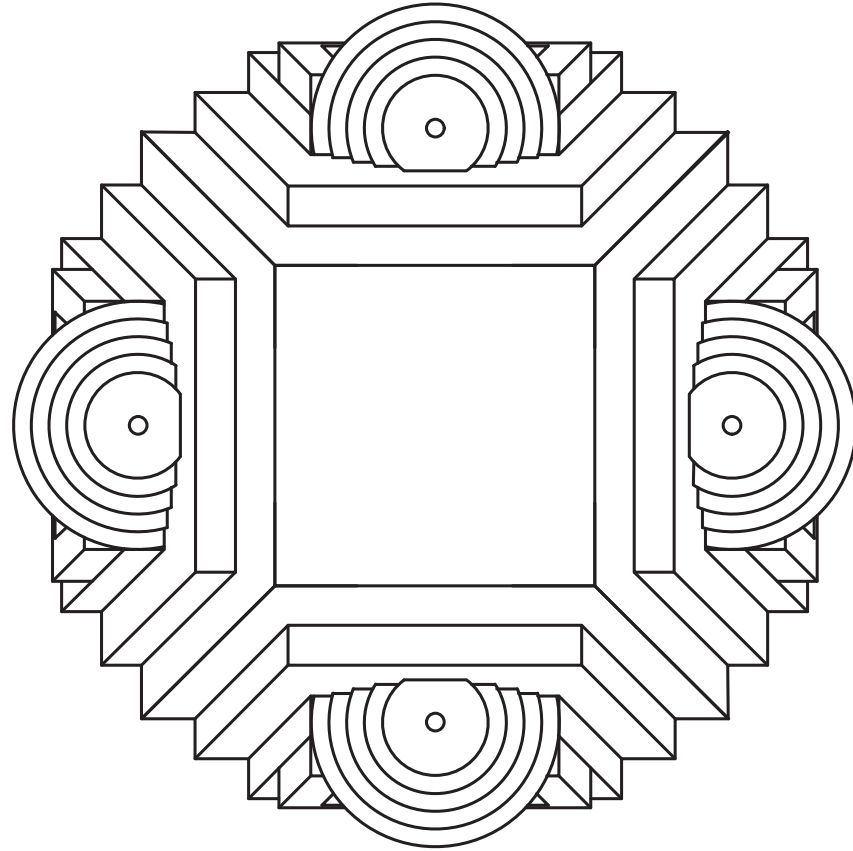

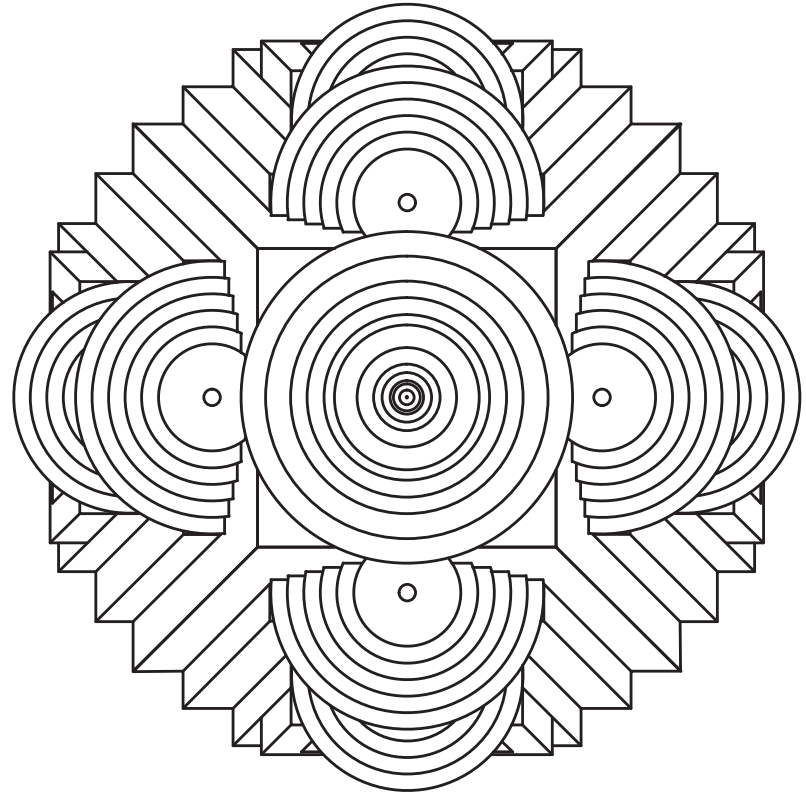

Our villa designs are highly focussed on indoor-outdoor integration of spaces which also inspired the planning of this outdoor hot-tub in a basement garden flowing out of the home gymnasium. The space is meditative and recreational in the same breath, truly holistic in function and aesthetics.
